DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/20/2006 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 5-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 has been amended to recite "and being the common center of gravity of all brake pads on said first side of the brake disk in the case of two or more brake pads on said first side" and similar. The original disclosure fails to support these limitations. The limitations therefore constitute new matter.

Claim Rejections - 35 USC § 102

Application/Control Number: 10/656,903

Art Unit: 3683

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5-10, 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Thiel et al (US 5464077).

Thiel et al disclose all the limitations of the instant claims including: a brake disk having a preferred rotational direction; a first brake pad 5 or 7 having a first resulting center of gravity 35 or 37 on a first side of the brake disk 10; a second brake pad 6 having a second resulting center of gravity 36 on a second side of the brake disk; a caliper 11 for transmitting braking forces produced by the second brake pad to the first side of the brake disk, and a clamping device 11 or 12 which has a center axis and is configured to push the first brake pad 5 or 7 against the brake disk, wherein the center axis is perpendicular to the main plane of the brake disk and extends through the first center of gravity 35 or 37, wherein the second center of gravity 36 is offset, both when the brake is at rest and when actuated, from the first center of gravity 35 or 37 by a predetermined distance in the circumferential direction toward the side of the brake disk which trails when the disk is rotating in the preferred rotational direction, so that the centers of gravity are circumferentially unsymmetrical and radially symmetrical.

Regarding claims 6-7, brake pads (5 or 7) and 6 have different configurations and/or weight distributions which determine the location of the centers and therefore are responsible "at least in part" for the offset along with the locations of the pads.

Application/Control Number: 10/656,903

Art Unit: 3683

Regarding claim 8, figure 3 shows a wedge shaped cross-section as broadly defined by the claim.

Regarding claims 12-13, elements 19 is a plate shaped bracket and the lower portion can be considered an axle part as broadly defined by the claims.

Regarding claim 14, Thiel et al show a sliding caliper.

Regarding claim 15, the brake is capable of use on commercial vehicles.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Thiel et al (US# 5464077).

Thiel et al disclose all the limitations of the instant claims with exception to the disclosure of the opening having a parallelogram contour. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize a parallelogram shape for the opening 2 or 3 or 4 (or 2-4 together) as an obvious design variant, thereby providing a visually appealing structure and/or improving access to the pads. Also note *In re Dailey*, 357 F.2d 669, 149 USPQ 47 (CCPA 1966) regarding the non-obviousness of changes in shape.

Art Unit: 3683

Response to Arguments

Applicant's arguments filed 11/20/2006 have been fully considered but they are not persuasive.

Please note the 112 1st rejection above. Also note applicant's arguments regarding counter-torque are narrower than the claimed invention. It is maintained that the rejections are proper.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley T. King whose telephone number is (571) 272-7117. The examiner can normally be reached on 11:00-7:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Siconolfi can be reached on (571) 272-7124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
